### Android usability

The latest, highly intuitive Google Android 3.0 "Honeycomb" operating system, specifically optimized for tablets, combined with Acer UI reaches a whole new level of interactivity. In the completely redesigned home page, all resources are at your fingertips, grouped according to four main usages: Game zone, eReading, Multimedia, Social Network and clear.fi.

### Fantastic gaming experience

The combination of high-resolution multi-touch screen and ultra-sensitive gyro meter makes the Acer ICONIA TAB A500 a formidable gaming platform with premium HD arcade games and complex online 3D games running so fast and with so much detail they almost leap out of the screen!

### Fun to go

ICONIA TAB A500 is designed to maximize content enjoyment, providing the same rich multimedia, gaming and web experience you can enjoy on your home PC with the added user-friendliness of the 10.1" multi-touch screen.

### Powerful at heart

The Acer ICONIA TAB A500 is equipped with a dual-core NVIDIA® Tegra™ 2, the first mobile dual core CPU, for up to two times faster web browsing, HD-optimized graphics, 3D and console-quality gaming, and an amazing multimedia experience thanks to the ultra-low power (ULP) NVIDIA® GeForce® GPU with Flash 10.1 support.

What's more you can enjoy movies, photos and more on your big screen TV in full HD thanks to HDMI HD video playback.
